WireCAD System Requirements

Client

WireCAD is desktop software.

Windows Vista or newer.

.Net Framework 4.0.

6 GIG RAM - more is better.

500+ MEG Disk Cost.

Mouse with mouse-wheel.

Dual monitors are recommended.

SQL Server

SQL Express 2012 or better.

This can be a physical or virtual machine.

WireCAD typically creates a new database for each project. In addition, there is a database for global data.

Database size and count are project dependent. A 20,000 cable project with no attached documents might consume 20 MEG.

File Server

This can be a physical or virtual machine.

Windows share, or Network Attached Storage (NAS).

The project count and file size determines disk cost. A small project might consume 10 MEG and a large might consume 250 MEG or more.
